

# 令和元年度 第10回 応用動物科学セミナー

## Investigating a strategy to protect reproductive health in women cancer patients What I learned as a postdoc at The Jackson Laboratory

江森 千紘 博士

米国ジャクソン研究所

Women cancer survivors can suffer from side-effects caused by cancer therapies. Genotoxic cancer treatments, for example, often damage immature eggs and potentially lead to reproductive health problems including infertility. Here I will talk about a strategy to protect reproductive health in women cancer patients in order to help them to have better quality of life. Additionally I would like to tell you about my postdoc life at The Jackson Laboratory in the US.

- 9月25日(水) 15:00 ~  
7号館A棟106号室
- 本セミナーは動物科学のフロンティア(修士課程)/動物科学フロンティア(博士課程)の講義1回分としても認定されます。履修者は、セミナーの内容についてレポートを作成の上(様式は自由)セミナー終了後2週間以内に右記担当教員まで提出すること。
